

# American POTATO JOURNAL

*Official Organ of the Potato  
Association of America*

VOLUME 36

JANUARY - DECEMBER 1959

## EDITORS

J. C. CAMPBELL, *Editor-in-Chief*

E. S. CLARK, *Associate Editor*

RUTGERS UNIVERSITY, NEW BRUNSWICK, NEW JERSEY

## OFFICERS

PAUL J. EASTMAN, *President*

ORRIN C. TURNQUIST, *President-Elect*

ROBERT V. AKELEY, *Vice President*

W. J. HOOKER, *Past President*

RICHARD L. SAWYER, *Secretary*

JOHN C. CAMPBELL, *Treasurer*

## DIRECTORS

WALTER C. SPARKS

C. E. CUNNINGHAM

D. S. MACLACHLAN

STARKS FARMS INC. ....	Route 3, Rhinelander, Wisconsin
BACON BROTHERS .....	1425 So. Racine Ave., Chicago 8, Illinois
L. L. OLDS SEED CO. ....	Madison, Wisconsin
FRANK L. CLARK, Founder — Clark Seed Farms .....	Richford, New York
RED DOT FOODS, INC. ....	Madison, Wisconsin
ROHM & HAAS COMPANY .....	Philadelphia, Pennsylvania
WISE POTATO CHIP CO. ....	Berwick, Pennsylvania
S. KENNEDY & SONS, Growers and Shippers of Potatoes and Onions .....	Clear Lake, Iowa
AMERICAN AGRICULTURAL CHEMICAL CO. ....	Carteret, New Jersey
LOCKWOOD GRADER CORP. ....	Gering, Nebraska
E. I. DU PONT DE NEMOURS AND CO. (INC.)	
Grasselli Chemicals Dept. ....	Wilmington 98, Delaware

## INDEX TO VOLUME 36

### Author and Title Index

- Akeley, Robert V. Effects of seed-cutting dates on yields of various potato varieties. 147-153.  
 ———, Call for papers. 113 and 140.  
 ———, see Houghland, G. V. C.
- Amla, B. L. and F. J. Francis. Phytic acid treatments for pre-peeled potatoes. 204-211.
- Anderson, R. E. Shelf life of raw French-fry potato strips in consumer bags. 404-406.
- Audia, William V., see Craft, C. C.
- Barnes, George L. Herbicidal agents as possible aids for roguing diseased seed-potato plants. 212-218.
- Belote, Mary L., see Harrington, W. C.
- Beraha, Louis, G. B. Ramsey, M. A. Smith and W. R. Wright. Effects of gamma radiation on some improtant potato tuber decays. 333-338.
- Bhargava, K. S. and R. D. Joshi. A virus disease of tree tomato — *Cyphomandra betacea* SENDT.—due to potato virus Y. 288-291.
- Bishop, J. C. and D. N. Wright. The effect of size and spacing of seed pieces on the yield and grade of White Rose potatoes in Kern County, California... 235-240.  
 ———, see Timm, Herman.
- Carpenter, P. N., see Gausman, H. W.
- Cecil, Ida, Andrea Mackey, Sue Joiner and Joy Stockman. Homemakers' reaction to two specific gravity classes of Russet Burbank potatoes. 81-89.
- Chapman, Mary E. G., see Hawkins, W. W.
- Chattopadhyay, S. B. and C. R. Das. A survey of rugose mosaic and leaf roll virus of potato in West Bengal—in plains. 16-21.
- Choudhuri, H. C. and S. C. Pal. Forecasting late blight of potatoes in the hills of West Bengal. 284-287.
- Corbett, E. G., see Gausman, H. W.
- Craft, C. C. and William V. Audia. Some effects of isopropyl N-(3-chlorophenyl) carbamate on respiration, water uptake and ion leakage on potato tissue. 386-393.
- Das, C. R., see Chattopadhyay, S. B.
- Dexter, S. T., see Sharma, M. K.
- Duncan, D. T., see Hooker, W. J.
- Durrell, L. W., see Schaal, Lawrence A.
- Eddins, A. H. Susceptibility of potato varieties and seedling selections to corky ring-spot. 187-190.
- Eichenmuller, J. J., see Gallegly, M. E.
- Ellis, N. K., see Wollcott, A. R.
- Estes, G. O., see Gausman, H. W.
- Fernow, K. H. Chemical elimination of volunteer potatoes. 407-409.
- Findlen, H., see Hruschka, H. W.
- Folsom, Donald. Potato tuber bruise rots in relation to crop rotation in Maine 1945-1956. 154-161.  
 ———, and B. A. Friedman. *Pseudomonas fluorescens* in relation to certain diseases of potato tubers in Maine. 90-97.
- Francis, F. J., see Amla, B. L.
- Friedman, B. A., see Folsom, Donald.
- Fullmer, F. S., see Tyler, K. B.
- Gallegly, M. E. and J. J. Eichenmuller. The spontaneous appearance of the potato race 4 character in cultures of *Phytophthora infestans*. 45-51.
- Gausman, H. W., G. O. Estes, E. G. Corbett, P. N. Carpenter, and R. A. Struchtemeyer. Some effects of sources of nitrogen and biuret on potatoes. 132-136.
- Graham, K. M., J. S. Niederhauser and Sebastian Romero. Observations on races of *Phytophthora infestans* in Mexico during 1956-1957. 196-203.
- Guthrie, James W. The influence of seed-piece treatment on disease control and yield of Russet Burbank potatoes. 309-314.

## Subject Index

- Abstracts of papers, see Potato Association.  
After-cooking darkening in oil-blanching French-fried potatoes. 255-261.  
    see Specific gravity.  
Alabama, see Yield.  
Amino compounds, recovery of, from potato starch processing water. 1-11.  
Bacterial ring rot, see Ring rot.  
Bengal, see Rugose mosaic.  
    see Late blight.  
Biuret, see Nitrogen.  
Black spot symposium summary. 76-78.  
Blight, see Late blight.  
Bonde, Dr. Reiner, death. 266.  
Book reviews, see Technology.  
    see Results of Fungicide Tests.  
    see Hanna's Handbook.  
    see Potato Processing.  
Bruise rots, of potato tubers in relation to crop rotation. 154-161.  
Browning, internal, of potato tubers: varietal susceptibility related to weather and culture. 394-403.  
California, see Seed size.  
    see Potassium studies.  
Canada, see Spindle tuber.  
Carbon dioxide, see Wet soil.  
Chemical composition, see Specific gravity.  
    elimination, see Elimination.  
Chip color, see Wet soil.  
Cockerham, Dr. George, honored. 370-371.  
Conservation, reserve acreage estimated. 141.  
Cooking, see After-cooking darkening.  
    see Specific gravity.  
Corky ring spot, susceptibility of potato varieties and seedling selections. 187-190.  
Dryland rotation, see Potato production.  
Elimination, chemical, of volunteer potatoes. 407-409.  
Fertilizer, see Seed spacing.  
Financial returns, see Seed spacing.  
Flakes, see Potato flakes.  
Forecasting, see Late blight.  
French-fried potatoes, see After-cooking darkening.  
    see Shelf life.  
Gamma radiation, effects on some important potato tuber decays. 333-338.  
Gray leaf spot controlled by Miller 658 Fungicide. 143.  
Hanna's Handbook of Agricultural Chemicals, book review. 139.  
Herbicides as aids for roguing diseased seed-potato plants. 212-218.  
Humidifiers for potato storage. 79.  
Ion leakage, see Isopropyl.  
Indian Potato Journal, announcement. 425.  
International potato research projects. 34-44.  
Irish potatoes, see Yield.  
Irradiation, see Storage rot.  
Isopropyl N-(3-Chlorophenyl) carbamate, effects on respiration, water uptake and ion leakage of potato tissue. 386-393.  
IR-1 Project, see Potato introduction.  
Late blight of potatoes in the hills of West Bengal. 284-287.  
    20-day forecasts of. 306.  
    see Peroxidase test.  
    see Tawa.  
Latent mosaic, see Tawa.  
Leaf roll virus, see Rugose mosaic.  
Light controls plant development. 342-343.  
MacLeod, Dr. Donald John, honored. 367-369.  
Maleic hydrazide, investigations on potatoes. 115-123.

- Maine, see Bruise rots.  
    see *Pseudomonas fluorescens*.  
Meristem culture and virus X. 191-195.  
Mexico, see *Phytophthora infestans*.  
National Potato Council News. 145.  
Nebraska, see Dryland.  
New Zealand, use of North American potato varieties in. 70-72.  
Nitrogen, effect of nitrogen sources and biuret on potatoes. 132-136.  
Norland, a new potato variety. 12-15.  
Nutrient uptake of Russet Burbank potatoes. 22-28.  
Ohio growers donate chip fryer for research. 264.  
Parks, Norman MacLeod, honored. 369-370.  
Peroxidase, activity in potato leaves and resistance to *Phytophthora infestans*. 121-131  
    tests in selection of potato varieties resistant to late blight. 315-324.  
Physical change of potato starch during precooking heating. 444-449.  
*Phytophthora infestans*, spontaneous appearance of potato race 4 characters in cultures  
    of. 45-51.  
    races of, in Mexico. 196-203.  
    see Peroxidase activity.  
Plant nutrient relationships. 56-63.  
Polyethylene exhibit. 143.  
Potassium studies with potatoes in Kern district, California. 358-366.  
Potato Association of America.  
    abstracts of papers. 292-305.  
    annual meeting announcement. 185-187, 225-226.  
    call for papers. 113-140.  
    committee membership. 223-224.  
    committee reports. 413-424.  
    financial reports. 375.  
    highlights of the 43rd annual meeting. 339-341.  
    Journal binders available. 344.  
    minutes of annual business meetings. 371-374.  
    nutrition (fertilization) committee report. 376-380.  
    program of 43rd annual meeting. 219-222.  
    report of membership committee. 380-381.  
Potato chip research, see Ohio.  
    flakes, cited by food technologists. 262.  
    granule production, see Processing variables.  
    introduction and preservation project policy. 457-460.  
    production in dryland rotations in Nebraska. 325-332.  
    race 4 character, see *Phytophthora infestans*.  
    tuber decays, see Gamma radiation.  
    internal browning, see Browning.  
Potato Processing, book review. 140.  
Pre-peeled potatoes, phytic acid treatment for. 204-211.  
Processing improvements widen market. 265.  
Processing variables on potato granule production. 241-254.  
*Pseudomonas fluorescens* in relation to certain diseases of potato tubers in Maine. 90-97.  
Purple top hair sprout and low soil temperature in relation to secondary tuber formation. 29-31.  
Recurrent parent characters, see *Solanum demmisum*.  
Respiration, see Isopropyl.  
Results of 1958 Fungicide Tests, book review. 139.  
Ring rot, sterilizing bags contaminated with. 52-55  
    eradication from seed stocks. 427-433.  
Roguing diseased plants, see Herbicidal agents.  
Root and sprout growth, see Temperature.  
Row-crop sprayer-duster developed. 141-142.  
Rugose mosaic and leaf roll virus in West Bengal. 16-21.  
Russet Burbank, see Nutrient uptake.  
    see Seed-piece treatment.  
    see Specific gravity.

Scab, see Norland.

see Tawa.

Seed-cutting dates, effects on yields of various potato varieties. 147-153.

Seed-piece treatment, effect on disease control of Russet Burbank. 309-314.

Seed spacing and fertilizer rate on field performance of potato varieties and on financial returns. 227-234.

Seed size and spacing effect on yield and grade of White Rose potatoes. 235-240.

Shelf life of raw French-fry potato strips. 404-406.

Silver plate for potatoes. 263.

*Solanum demissum* x *S. tuberosum*, recovery of recurrent characters from crosses. 345-357.

Specific gravity, and chemical composition relative to hardness of potato tubers after cooking. 105-113.

classes of Russet Burbank potatoes. 81-89.

Spindle tuber in eastern Canada. 450-454.

Sprout inhibition of bulk stored potatoes. 32-34.

tuber formation, see Purple top.

Storage rot susceptibility in tubers exposed to ionizing irradiation. 162-172.

Streptomyces, simplified method of isolating single cells. 137-139.

Suberin and wound periderm formation. 64-69.

Sugar content, see Wet soil.

Tawa: a new potato variety. 267-274.

Technique (statistical) for evaluating yielding ability. 381-385.

Technology of Food Preservation, book review. 341.

Temperature, influence on rate of root and sprout growth. 173-178.

To plant or not to plant—grower's soliloquy. 142.

Tree tomato, see Virus Y.

Tucker, John, in memoriam. 307.

Virus A, evaluating potato seedling varieties for field immunity to. 275-283.

Virus X, a yellow strain of. 98-104.

rate of movement in three varieties. 410-413.

see Meristem.

Virus Y, a disease of tree tomato due to 288-291.

Wet soil and carbon dioxide effect on potato chip color and sugar content. 450-456.

White Rose potatoes, see Seed size and spacing.

Waxing, effect on weight loss, shrivelling, decay and appearance. 434-443.

Wound periderm, see Suberin.

Yield of Irish potatoes in Alabama, effects of practices. 179-184.
